LAB 5 – CSS

At the end of this lab, students should be able to:

- Design a web page by incorporating proper Cascading Style Sheet (CSS) property and values.
- Use different variations of CSS such as External, Internal/Embedded and Inline.
- Use varieties of CSS properties and values to design the webpages.

Question 1

Write the **Internal CSS** codes for the following web page design. The HTML codes are already given.

Guides

- The whole webpage:
  - The background colour is #FFFFEE.
  - An image is repeated vertically on the right side of the web page.
  - A gap of 200px is given on the right side of the browser to avoid the image being overlapped by the words.
- Heading level 1:
  - The background colour is #20B2AA while the font color is white. It is center aligned.
- Heading level 2:
  - The text is underlined.
- Paragraphs with the *job-title* class:
  - The text is bold and uses Arial font and the colour is #B22222.
- The *company* class:
  - The text is italic and uses Arial Narrow font. The colour is #00008B.
- The *location* class:
  - It has a normal text, Arial Narrow font and the colour is black.
- The *bold* id:
  - The text is bold and black.
- The *content* id:
  - Set a left margin of 50px.
  - The font colour is #909090 and the font is Verdana. The size of the font is 10pt.
- The default hyperlink and visited hyperlink:
  - The text colour is #FF1493 without any underlines.
- When the mouse goes over the hyperlinks:
  - The text colour changes to #3CB371 with a 5px space between the letters and the text has a line above it.
